### **Response to Amendment**

This is in response to an amendment file on March 10<sup>th</sup>, 2004 for letter for patent filed on February 16<sup>th</sup>, 2001 in which claims 1-37 were presented for examination. In the amendment, claims 1, 12, 19, 30 and 35 have been amended, no claim has been canceled, and no claim has been added. Claims 1-37 remain pending in the letter.

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1, 12, 19, 30 and 35 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over by Leon (U.S. Patent No. 6,424,954) in view of Cordery et al (U.S. Patent No. 5,953,247).
4. As per claims 1-5, 10, 12, 19, 24-29, 30, 35 and 36, Leon teaches a method of printing a VBI such as a ticket, a coupon, a mail piece, a travelers, check or a currency, comprising generating a message digest by hashing relevant 2-D bar code information, and generating a

Art Unit: 3621

textual digital signature from the message (*see fig 9*). Leon fails to teach an inventive concept including a stateless cryptomodule and a plurality of user computer in communication with the cryptomodule to communication digital signature. However, Cordery et al teach an inventive concept including a stateless cryptomodule and a plurality of user computer in communication with the cryptomodule to communication digital signature (*see column 7 line 60-8 line 19*).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the inventive concept of Leon to include Cordery et al's inventive concept including a stateless cryptomodule and a plurality of user computer in communication with the cryptomodule to communication digital signature because this would have provided a tamper resistant system the would be able to communicate with the remote location for secured transfer of information.

5. As per claims 6-9, 13-16, 20-23 and 31-34, Leon teaches a method of the digital signature and the 2-D bar code include sides (such as right, left, top and bottom (*see fig 9*).

6. As per claims 11 and 37, Leon teaches a method wherein the relevant information including one or more of indicium version number, an algorithm identifier, a certificate serial number, a postage security device manufacturer identifier, a model identifier, postage device serial number, an ascending register value (*see fig 1A, 1B, table 3 column 42 and table in column 60*).

*Conclusion*

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

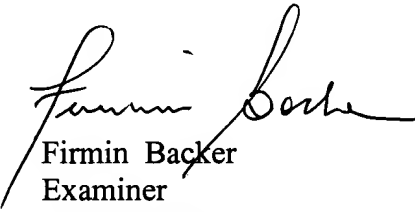

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
